

UNIVERSITÀ CAMPUS BIO-MEDICO DI ROMA

Università Campus Bio-Medico di Roma (UCBM) was founded at the encouragement of Blessed Álvaro del Portillo, the first Prelate of Opus Dei, to embody the message of St. Josemaría Escrivá to live Christian faith and charity in daily work.

Università Campus Bio-Medico di Roma promotes integrated teaching and research facilities, pursuing the good of the person as the main aim of its activities. It offers the student an educational experience aimed at his cultural, professional and human growth, conferring the acquisition of skills in a spirit of service. It promotes knowledge and the interdisciplinarity of sciences and research in all areas that contribute to the good of the whole person. The student's care of the patient's unity of physical and spiritual needs according to a conception of life open to transcendence.

Why study at the Unicampus University?

1. Founded by the Opus-Dei, Campus Bio-Medico University of Rome offers students a dynamic learning experience that encourages cultural, professional, spiritual and personal growth, while promoting the acquisition of skills in a service-oriented spirit.
2. Unicampus university was ranked in the **first quartile of the general ranking, and also at 396th place for research quality, out of 1904 universities from 108 countries**. In particular, UCBM ranks at **18th place among the 56 Italian universities** present in the prestigious THE ranking (out of the 97 universities on the peninsula).
3. It offers a training environment where teaching, research and healthcare take place in a single location with interconnected facilities; where the well-being of the individual is the ultimate aim of all activities, and where learning is fostered by an interdisciplinary approach to science and research in all areas related to patient care.
4. It provides inter-professional education: fostering understanding of how medical conditions affect patients and their social and family environment.
5. It offers solid educational background in basic sciences: providing a broad knowledge of the biologically complex structures and functions of the human organism under physiological conditions.
6. It offers solid educational background in human sciences (Anthropology, Ethics, and Bioethics): providing knowledge of the different cultures that form the social environment, which is fundamental for doctors in a multi-ethnic society in continuous and rapid evolution.
7. It specifically focuses in clinical skills: developing analytical and problem-solving skills in medical practice.
8. It focuses on 'environmental' skills: developing the students' ability to assess the environmental, political and occupational impact of health and diseases; assessing the health service, its effectiveness, and its impact in economic terms, especially by measuring its value through a cost benefit analysis.
9. Special attention is paid to transversal soft skills: developing and consolidating self-directed learning and self-assessment skills, time management skills, planning and organisational skills.
10. Unicampus strives to foster the habit of systematically updating knowledge and skills.
