

UNIVERSITA DI GENOVA

The University of Genoa was founded in 1481 in Genoa, Italy. The University has become one of the scientific and cultural centers of the Mediterranean and Northwestern Italy. In addition to working together with IIT, the Italian Institute of Technology, it is at the forefront in Europe with the education it provides and research in the field of computer science.

Genova is also a port city. Since shipping is highly developed in the city, departments in this field step forward at the university and these departments have achieved higher successes in their fields.

Why study at UniGe?

1. Founded in 1481, UniGe has a heritage of more than six centuries of academic tradition and is a leading player in the European scientific and cultural debate, a solid basis for new opportunities.
2. 87% of graduates find a job within one year after graduation, which is higher than majority of Italian universities.
3. More than 88% of graduates find a job within three years after graduation.
4. UniGe provides students with a library system of excellence, laboratories with the most up-to-date IT infrastructure and classrooms open evenings and weekends
5. At UniGe enhance your personal resources and have direct contact with players in the job market.
6. UniGe is part of the Ulysseus programme and attracts students from all over the world. The development of cultural exchanges and international collaborations is one of UniGe's main goals.
7. UniGe places sustainability and wellbeing at the heart of university life and is committed to a pact of co-responsibility with future generations.
8. UniGe wants to contribute to a new relationship between Humanity and the Planet, where Knowledge and Research are the main tools to face and solve the great challenges.
9. UniGe has for years been committed to the advancement of gender equality, respect for diversity, anti-discrimination and inclusion.
10. Coordinated development of university and competitive careers thanks to agreements and programmes, such as *UniGe for Sport* (CUS Genova).
